Those who do not so qualify may file with the Pollution Control Board an objection in writing under section 13 (6), in the same manner and time period as described above.

Preamble—The new sewage-treatment plant at Maple Ridge is scheduled to go into operation shortly, and the outfall will be discharging treated effluent instead of raw sewage as at present. To increase or decrease the "quantity to be discharged" by deleting that part of section C of the permit which reads "650,000 gallons per day" and substituting in its place the following: "1,670,000 imperial gallons per day".

I, R. W. Fitzsimmons, hereby certify that a copy of this application has been received by the Regional District of Dewdney-Alouette.

This application, dated on the 8th day of January 1974, was posted on the ground in accordance with the Pollution Control Regulations.

APPLICATION FOR PERMIT UNDER POLLUTION CONTROL ACT, 1967 (Emissions)

THIS APPLICATION is to be filed with the Director, Pollution Control Branch, Parliament Buildings, Victoria, B.C. Any person who qualifies as an objector under section 13 (3) of the *Pollution Control Act, 1967* may, within 30 days of the date of application, or within 30 days of the date of publication in *The British Columbia Gazette* or in a newspaper, or, where service is required, within 30 days of the serving of a copy of the application, file with the Director an objection in writing to the granting of a permit, stating the manner in which he is affected. Those who do not so qualify may file with the Pollution Control Board an objection in writing under section 13 (6), in the same manner and time period as described above.

Preamble—This application for a permit under the *Pollution Control Act, 1967* covers emission from the burning of waste explosives scrap on land which is leased to CIL Explosives Works at Endako. The waste explosives scrap is the normal result of the routine plant operation. It is a long-established practice in the explosives industry that the only safe way to render the waste scrap explosives safe and harmless is to burn them unconfined in the open air at the plant-site. Other options would give rise to dangerous explosive situations which could cause serious injury to personnel and property.

Canadian Industries Limited, of 800 Terminal Avenue, Vancouver, B.C., hereby applies to the Director for a permit to discharge or emit contaminant(s) into the air from CIL Explosives Works located at Endako, and gives notice of its application to all persons affected.

The land upon which the works are located is leased from the CNR and consists of 86 acres comprising the east half and northwest quarter of Lot 3833, Range 5, Coast District.

The discharge or emission shall be located at the plant-site in a pit dug into sand approximately 600 feet from the Endako River.

The rate of discharge is (dry basis): (a) Maximum, undeterminable; duration, 20 minutes per hour; frequency, 10 times daily. (b) Average daily (based on normal daily operating period), undeterminable.

The operating period during which contaminant(s) will be discharged is 24 to 48 hours a week on a variable and intermittent basis.

The characteristics of the contaminant(s) to be discharged are as follows: The emissions result from burning waste explosives scrap in the open air. Approximately 225 pounds a week are burned which consist of about one-third trinitrotoluene, one-third aluminum powder, one-third paper, and containing about 2 pounds of sulphur. The exact composition of the contaminant emissions cannot be practically determined because of variations in the burning rate and in scrap composition.

The type of treatment to be applied to the contaminant(s) is as follows: No treatment of the emissions is possible because of the extreme safety hazard in burning explosive materials.

TIMBER SALE LICENCE A06692

A PUBLIC AUCTION will be held by the District Forester at Kamloops, B.C., at 10.30 a.m., or as soon as possible thereafter, the 15th day of March 1974, for the purchase of Licence A06692, to authorize the harvesting of not more than 2,985,000 cubic feet of timber each year for a 1-year period.
